Trading foreign exchange on margin carries a high level of risk and may not be suitable for all investors. Always invest the money you can afford to lose. The high degree of leverage can work against you as well as for benefiting you. Before deciding to trade foreign exchange you should carefully consider your investment objectives, level of experience and risk appetite. The possibility exists that you could sustain a loss of some or all of your initial investment and therefore you should not invest money that you cannot afford to lose. You should be aware of all the risks associated with foreign exchange trading, and seek advice from an independent financial advisor if you have any doubts.

Always use the "STOP LOSS ORDERS" to minimize your risk.... Always-Always-Always
